SPECIAL DELIVERY STAMPS

Design: Dragon in irregular oval.

Stamp 8x2½ inches, divided into four parts by perforation or serrate rouletting.

Values of Nos. E1-E8 are for used mailer's receipts. Complete unused strips of four are exceptionally scarce because the first section (#1) was to remain in the P.O. booklet.

The mailer received the righthand section (#4), usually canceled, as a receipt. The middle two sections were canceled and attached to the letter. Upon arrival at the destination P.O. they were canceled

again, usually on the back, with the right-hand copy (#3) retained by that P.O. The lefthand copy (#2) was signed by the recipient and returned to the original P.O. as evidence of delivery. Sections 2 and 3 usually are thin or badly damaged.

Unused strips of three (#2-4) can be found of Nos. E3-E8.

"Chinese Imperial Post Office" in lines, repeated to form the background which is usually lighter in color than the rest of the design.

Northeastern Provinces

民 中

國 華

With the end of World War II and the collapse of Manchukuo, the Northeastern Provinces reverted to China. In many Manchurian towns and cities, the Manchukuo stamps were locally handstamped in ideograms: "Republic of China," "China Postal Service" or "Temporary Use for China." A typical example is shown above.

CHINA, PEOPLE'S REPUBLIC OF

'pē-pəls ri-'pə-blik of 'chī-nə

LOCATION — Eastern Asia
GOVT. — Communist Republic
POP. — 1,246,871,951 (1999 est.)
CAPITAL — Beijing (Peking)

The communists completed their conquest of all mainland China in 1949. They established the Central Government and General Postal Administration in Peking. They ordered all but two regions to stop selling regional issues by June 30, 1950, extending validity one year from that date. The Northeast and Port Arthur-Dairen regions were exempted because their currency had a different value. These two regions stopped using separate issues at the end of 1950. Thereafter unified issues were used throughout mainland China.

On July 1, 1997 Hong Kong returned to Chinese control as an administrative district. Hong Kong stamps issued under Chinese rule will continue to be listed under "Hong Kong."

Reprints

After currency revaluation Mar. 1, 1955, reprints were prepared and put on sale by the Philatelic Agency in order to supply stocks of exhausted issues for collectors. Minor differences in design or paper distinguish the reprints. They are of commemorative and special issues up to the gymnastics set of 1952. Reprints are less expensive. Values are for original issues. Reprint distinctions are footnoted.

Used Stamps

Most used stamps before 1970 exist primarily canceled to order. Postally used copies generally sell for ½ the unused value.

Beginning in 1987 the PRC stopped furnishing quantities of used stamps to the philatelic market. When available, used stamps of these issues sell for the same or more than unused copies.

PRC Issue Numbers

Commemorative issues, beginning in 1949, and special issues, beginning in 1951, bear 4 numbers in lower margin: 1. Issue number. 2. Total of stamps in set. 3. Position of stamp in set. 4. Cumulative number of stamp (usually in parenthesis). A fifth number, the year of issue, was added in 1952.

The numbering system varies at times, with all numbers omitted on Scott 938-1046.

In certain sets listings include parenthetically the position-in-set number. During some periods these parentheses in listings hold the stamp's cumulative number. Issue numbers are noted when one or more designs are not illustrated.

Gum

All stamps to the beginning of 1960 were issued without gum, except as noted. After that date, most stamps have gum, which is translucent and almost invisible. All issues are unwatermarked, unless otherwise noted.

100 fen = 1 yuan ($)

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 487 in the regular postage section, Scott B1 in the semi-postal section.

Syncopated Perforations

Type A (1st stamp #2880): On the two shorter sides, an oval hole equal in width to three holes is centered.

This stamp also was printed in deep purple, orange & red, and blue, orange & red. These were not issued.

While it has been assumed for many years that each color was for a separate branch of the armed forces (army, air force and navy), there is no documentation to support that theory. Quantities printed also do not correspond to the number of servicemen in each branch.

NORTHEAST CHINA

The Northeast Liberation Area included the provinces of Liaoning, Kirin, Jehol and Heilungkiang, the area generally known as Manchuria under the Japanese. The first post war issues were local overprints on stamps of Manchukuo. In early 1946, a Ministry of Posts and Telegraphs served the areas already liberated, and in August, 1946, a Communications Committee of the Political Council was established. In June, 1947, these postal services were subordinated to the Harbin General Post Office, and this was extended to Changchun on Oct. 22, 1948, and to Mukden on Nov. 4, 1948. It was rapidly extended to cover all Manchuria.

Rough Perfs

Rough perforations are normal on most regional issues.

kə-'ləm-bē-ə

LOCATION — On the northwest coast of South America, bordering on the Caribbean Sea and the Pacific Ocean
GOVT. — Republic
AREA — 456,535 sq. mi.
POP. — 39,309,422 (1999 est.)
CAPITAL — Bogota

In 1810 the Spanish Viceroyalty of New Granada gained its independence and with Venezuela and Ecuador formed the State of Greater Colombia. In 1832 this state split into three independent units as Venezuela, Ecuador and the Republic of New Granada. The name of the country has been, successively, Granadine Confederation (1858-61), United States of New Granada (1861), United States of Colombia (1861-65), and the Republic of Colombia (1885 to date).

100 Centavos = 1 Peso

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 594 in the regular postage section, Scott B1 in the semi-postal section, Scott C200 in the airpost section, Scott CE1 in the airpost special delivery section, Scott E2 in the special delivery section, and Scott RA33 in the postal tax section.

In the earlier days many towns did not have handstamps for canceling and stamps were canceled with pen and ink. Pen cancellations, therefore, do not indicate fiscal use. (Postage stamps were not used for revenue purposes.) Used values for Nos. 1-128 are for stamps with illegible manuscript cancels or handstamp cancels of Bogota or Medellin. Stamps with legible manuscript or other handstamped town-name cancels sell for more.

Fractions of many Colombian stamps of both early and late issues are found canceled, their use to pay postage having been tolerated even though forbidden by the postal laws and regulations. Many are known to have been made for philatelic purposes.

1919 Unwmk. *Perf. 14*

C1	A107	2c car rose	2,750.	1,300.
a.		Numerals "1" with serifs	*5,500.*	*3,250.*

Used for the first experimental flight from Barranquilla to Puerto Colombia, 6/18/19.
Values are for faulty copies.

Issued by Compania Colombiana de Navegacion Aerea

From 1920 to 1932 the internal airmail service of Colombia was handled by the Compania Colombiana de Navegacion Aerea (1920) and the Sociedad Colombo-Alemana de Transportes Aéreos, known familiarly as "SCADTA" (1920-1932).

These organizations, under government contracts, operated and maintained their own post offices and issued stamps which were the only legal franking for airmail service during this period, both in the internal and international mails. All letters had to bear government stamps as well.

ANTIOQUIA

ˌant-ē-ˈō-kē-ə

Originally a State, now a Department of the Republic of Colombia. Until the revolution of 1885, the separate states making up the United States of Colombia were sovereign governments in their own right. On August 4, 1886, the National Council of Bogotá, composed of two delegates from each state, adopted a new constitution which abolished the sovereign rights of states, which then became departments with governors appointed by the President of the Republic. The nine original states represented at the Bogotá Convention retained some of their previous rights, as management of their own finances, and all issued postage stamps until as late as 1904. For Panama's issues, see Panama Nos. 1-30.

The Comoro Archipelago consists of the islands of Mayotte, Anjouan, Grand Comoro (Grande Comore) and Moheli, which issued their own stamps as French protectorates or colonies from 1887-1914. The archipelago was attached to Madagascar from 1914 to 1946, when it became a separate French territory. In July 1975, Anjouan, Grand Comoro and Moheli united to declare independence as the State of Comoro. Mayotte remained French.

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 238 in the regular postage section, Scott C117 in the air post section, Scott CE1 in the air post special delivery section, Scott E1 in the special delivery section, and Scott RA1 in the postal tax section.

Watermarks

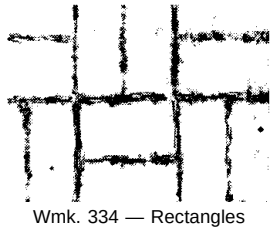
Wmk. 229 — Wavy Lines



Wmk. 334 — Rectangles

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 1-22 will have perforations just clear of the design on one or more sides due to the placement of the stamps on the plates and to imperfect perforating methods.

Remainders

In 1914 the government sold a large quantity of stamps at very much less than face value. The lot included most regular issues from 1901 to 1911 inclusive, postage due stamps of 1903 and official stamps of 1901-03. These stamps were canceled with groups of five thin parallel bars. The higher valued used stamps, such as Nos. 64, 65-68a, sell for much less than the values quoted which are for stamps with regular postal cancellations. A few sell for much higher prices.

OFFICIAL STAMPS

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Examples without gum have probably been used and are so regarded.

Very fine examples of Nos. O1-O24 will have perforations just clear of the design on one or more sides.

Nos. O1-O55 normally were not canceled when affixed to official mail. Occasionally they were canceled in a foreign country of destination. Used values are for favor-canceled specimens or for stamps without gum.

GUANACASTE

ˌgwä-nə-ˈkästā

(A province of Costa Rica)

LOCATION — Northwestern coast of Central America
AREA — 4,000 sq. mi. (approx.)
POP. — 69,531 (estimated)
CAPITAL — Liberia

Residents of Guanacaste were allowed to buy Costa Rican stamps, overprinted "Guanacaste," at a discount from face value because of the province's isolation and climate, which makes it difficult to keep mint stamps. Use was restricted to the province.

Counterfeits of most Guanacaste overprints are plentiful.

For 5c stamps between Nos. 5-43, unused examples without gum sell for slightly more than the used value.

Very fine examples of Nos. 1-54 will have perforations just clear of the design on one or more sides.

Dangerous counterfeits exist of Nos. 1-63.

CUBA

'kyü-bə

LOCATION — The largest island of the West Indies; south of Florida
GOVT. — Former Spanish possession
AREA — 44,206 sq. mi.
POP. — 11,096,395 (1999 est.)
CAPITAL — Havana

Formerly a Spanish possession, Cuba made several unsuccessful attempts to gain her freedom, which finally led to the intervention of the US in 1898. In that year under the Treaty of Paris, Spain relinquished the island to the US in trust for its inhabitants.

In 1902 a republic was established and the Cuban Congress took over the government from the military authorities.

8 Reales Plata = 1 Peso
100 Centesimos = 1 Escudo or Peseta (1867)
1000 Milesimas = 100 Centavos = 1 Peso

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 402 in the regular postage section, Scott B3 in the semi-postal section, Scott C38 in the airpost section, Scott CB1 in the airpost semi-postal section, Scott E13 in the special delivery section, and Scott RA1 in the postal tax section.

Pen cancellations are common on the earlier stamps of Cuba. Stamps so canceled sell for very much less than those with postmark cancellations.

Type of 1882

Original

1st retouch

2d retouch

The differences between the stamps of 1882 and the various retouches are as follows:

Original state: The medallion is surrounded by a heavy line of color of nearly even thickness, touching the horizontal line below the word "Cuba" (or "Filipinas," "Puerto Rico," as the case may be); the opening in the hair above the temple is narrow and pointed.

1st retouch: The line around the medallion is thin, except at the upper right, and does not touch the horizontal line above it; the opening in the hair is slightly wider and a trifle rounded; the lock of hair above the forehead is shaped like a broad "V" and ends in a point; there is a faint white line below it, which is not found on the stamps in the original state. Owing to wear of the plate the shape of the lock of hair and the width of the white line below it vary.

2nd retouch: The opening in the hair forms a semi-circle; the lock above the forehead is nearly straight, having only a slight wave, and the white line is much broader than before.

CYPRUS

ˈsī-prəs

LOCATION — An island in the Mediterranean Sea off the coast of Turkey
GOVT. — Republic
AREA — 3,572 sq. mi.
POP. — 754,064 (1999 est.)
CAPITAL — Nicosia

The British Crown Colony of Cyprus became a republic in 1960.

Turkey invaded Cyprus in 1974 resulting in the the northern 40% of the island becoming the Turkish Republic of Northern Cyprus. No other country recognizes this division of the island.

See Turkey in Volume 6.

12 Pence = 1 Shilling
40 Paras = 1 Piaster
9 Piasters = 1 Shilling
20 Shillings = 1 Pound
1000 Milliemes = 1 Pound (1955)
100 Cents = 1 Cyprus Pound (1983)

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 156 in the regular postage section and Scott RA1 in the postal tax section.

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 1, 2 and 7-10 will have perforations touching the design on at least one or more sides due to the narrow spacing of the stamps on the plates and to imperfect perforation methods. Stamps with perfs clear on all four sides are scarce and will command higher prices.
